

Workforce Go! integrates people, payroll and time management with Intacct accounting software more seamlessly than any other HRMS solution.

Bi-synchronous integration between your accounting and human capital management systems means **faster and more accurate processing**. And Intacct's comprehensive real-time analytics means **more effective forecasting**.

### When used together, what can Workforce Go! and Intacct help you do?

#### Save Time

- One-click transactions link entries in payroll to Intacct.
- Intacct's standard and user-defined dimensions are automatically recognized and available for use in payroll and HRMS.
- Enterprise class HRMS functionality is available to Intacct users.

#### Reduce Errors

Since payroll transactions automatically post to Intacct, you can avoid the steps in which these errors are most likely to occur:

- Rekeying, reformatting or refining
- Exporting/Importing

#### Eliminate Reporting Delays

Since your Intacct dimensions are fully supported in payroll and HRMS, so you can avoid these frustrating actions:

- Rekeying in payroll
- Adding information to payroll transactions after-the-fact

#### Make Functionality Choices

- Outsourced or in-house payroll processing, both fully supported
- Robust, ad-hoc reporting and analytics
- Employee/manager self-service capabilities
