

Connecting data to Wdesk

Wdesk offers the ability for two-way connections with separate words and platforms. Pre-built connections exist for Oracle® ERP Cloud, SAP® S/4HANA, NetSuite®, Host Analytics®, Intacct®, and Excel®. The Wdesk connector allows users to plug their work directly into a single system or into multiple external systems.

Leverage lookups and linking to build aggregations, reports, and transformations in Wdesk, and use the data and insights throughout the rest of your work with linking. Then easily refresh the data with just a click.

Get started today by using one of our existing connectors, or build your own integrations through our API.

BENEFITS

Automation

No more manual efforts. Directly connect your ERP, GL, or data warehouse to Wdesk. When you need the latest information, just click *Update*, and Wdesk refreshes the data.

Data governance

Like all data in Wdesk, data brought in through external systems leaves a comprehensive audit trail. View a detailed history of source systems used, datasets, date and time of updates, and who pulled in data.

Reduced risk

Because of the direct connection, data no longer needs to be exported to Excel or manually handled before entering Wdesk. That means fewer steps and less chance of human error.

Once source of truth

Data from external systems can be leveraged across the platform using formulas, lookups, and links—creating a single, comprehensive source of truth for your work, your team, and your organization.

The Wdesk cloud platform connects data, documents, and people in powerful ways. **Trusted by more than 2,800 organizations worldwide**, Wdesk drives collaboration and efficiency in reporting and planning across your business.

FEATURES

Pre-built connections

Workiva has a growing number of pre-built and maintained connections to supported systems, including:

- Oracle ERP Cloud
- SAP S/4HANA
- NetSuite
- Intacct
- Host Analytics

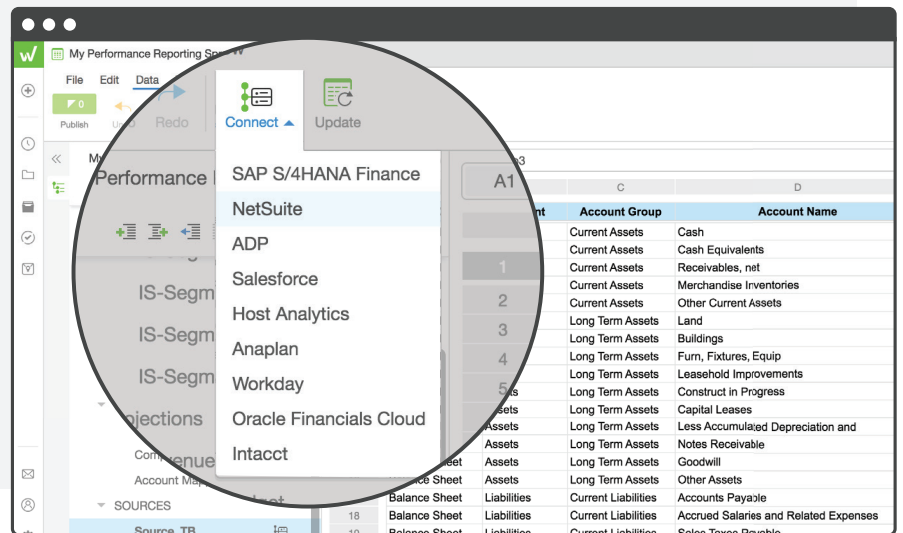

Connected sheets

The Wdesk connector for Spreadsheets lets you connect to data from other systems. Sheet permissions help you control who can edit and update the source data that drives your work in Wdesk.

Build your own connection

If your IT team would like to create a connection or if you have an in-house system, we can help. Using our connections toolkit, data from your system(s) can be sent to Wdesk Spreadsheets and used throughout the Wdesk platform.

ABOUT WORKIVA

Workiva (NYSE:WK) delivers Wdesk, an intuitive cloud platform that is modernizing how people work within thousands of organizations, including over 70 percent of the 500 largest U.S. corporations by total revenue. Wdesk is built upon a data management engine, offering controlled collaboration, data integration, granular permissions, and a full audit trail. Wdesk helps mitigate risk, improves productivity, and gives users confidence in their data-driven decisions. For more information, [visit workiva.com](http://workiva.com).
