

INTEGRATION OVERVIEW

- Integrate easily with minimal setup time
- Sync orders, jobs, vendors, and cost codes
- Accurate reporting and accounting for every transaction

2 Weeks
(or less) to implement

Key Features

Cloud

- **Synchronize** purchase orders and invoices into Sage Intacct in just one click.
- **Batch process** multiple purchase orders and invoices simultaneously into Sage Intacct.
- **Three-way reconciliation** powered by AI automatically catches discrepancies between POs, quotes, and invoices.
- **Eliminates manual data entry** and improves accuracy, so teams can focus on higher-value work.
- **Fast to set up** with minimal IT effort.

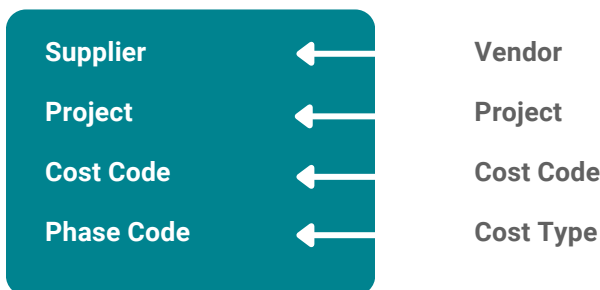

Overview of Fields Being Mapped

Remarcable connects to Sage Intacct and keeps your entire operation in sync. Below is an overview of the core data Remarcable exchanges to keep your field, purchasing, and accounting teams aligned.

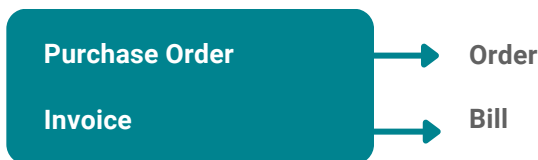

Imported Fields

Remarcable ingests these fields from Sage Intacct in a single direction.

Exported Fields

Remarcable sends these fields to Sage Intacct in a single direction.

Sage API Key Disclaimer:

Integrating with Sage Intacct requires an additional annual fee + API hit, which is not covered by Remarcable. This fee necessitates a membership and must be arranged directly with Sage. We recommend discussing with Sage to ensure you understand the cost and requirements.

Getting Setup

An overview of what you can expect from Remarcable's implementation into Sage Intacct.

STEP 1

Integration Planning & Discovery

We begin by aligning with your team to understand project structures, data setup, and specific accounting needs. This step includes reviewing your Sage Intacct environment and outlining how Remarcable will connect with your existing workflows.

STEP 2

System Access & Connectivity Setup

Remarcable's engineering team partners with your IT or accounting leads to establish secure database connections. We define credential requirements and confirm system access to enable safe, reliable syncing between Remarcable and Sage Intacct.

STEP 3

Project & Data Synchronization

Once access is verified, we configure job and project data syncing from Sage Intacct into Remarcable. This ensures your field and purchasing teams have up-to-date project information right from the start.

STEP 4

Configuration & Testing

Our engineering and customer success teams collaborate with your accounting staff to map data fields, configure sync behaviors, and rigorously test the integration. This ensures all POs, jobs, and invoices move seamlessly between systems.

STEP 5

PO & Invoice Import Training

We guide your team through importing purchase orders and invoices from Remarcable into Sage Intacct, providing step-by-step training tailored to your workflows. You'll gain confidence and clarity on every transaction.
