

One platform. Every finance need.

AI-powered. Excel-native. Built for the modern CFO's office.

Datarails is your all-in-one platform for financial reporting and analysis, from FP&A and cash management to spend control and month-end close.

Flexible, scalable, and Excel-native, Datarails transforms the CFO's office into the home of business insights.

Real impact, measurable results

Finance teams using Datarails report transformative improvements in accuracy, visibility, and efficiency

75%

less manual spreadsheet work

50

hours of work saved a month

4X

increase in efficiency

"It's not just faster, it's smarter. We don't have to reinvent the wheel every month."

Andy Austin, CFO, Carrollton Development Group

"I think choosing Datarails was the greatest decision ever for our company."

Grace Li, Manager of Corporate Accounting, Origin Investments

Where finance works smarter, not harder

Datarails connects every part of your financial process, creating one seamless flow from data to decisions

FP&A

The complete FP&A solution for finance teams who want to move faster and plan smarter, Datarails FP&A automates consolidation and reporting, streamlines budgeting and forecasting, and provides AI-powered insights to help you analyze and plan with precision and unmatched flexibility.

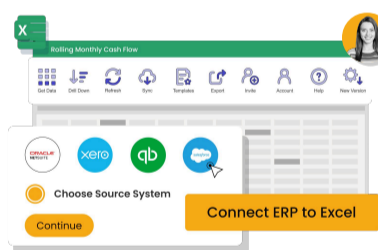

- Real-time dashboards & insights
- Collaborative workflows
- Strategic planning

Connect

Automating and simplifying reporting and analytics, Datarails Connect consolidates all your financial data from multiple systems and delivers real-time dashboards and reports, turning hours of manual work into minutes.

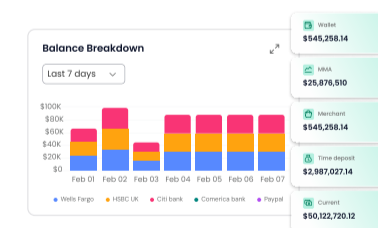

- Unified data sources
- Faster insights
- Effortless sharing

Cash Management

Gain full visibility into your company's cash position, worldwide. Datarails Cash Management automates your cash reporting, forecasting, and analysis, helping you avoid liquidity risks and plan ahead with confidence.

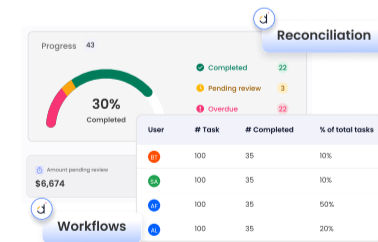

- Centralized cash visibility
- Automated forecasting
- Global bank connectivity

Month-End Close

Close your books faster and with greater confidence. Datarails Month-End Close automates reconciliations, approvals, and workflows to provide finance with transparency, accuracy, and audit-ready documentation every step of the way.

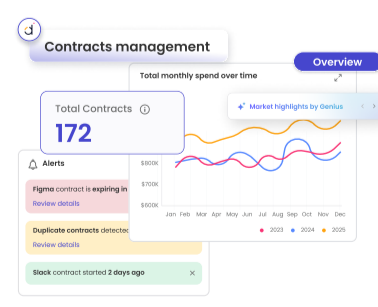

- Task & workflow tracking
- Version history & sign-offs
- Audit-ready transparency

Spend Control

Providing complete visibility and control over all vendor contracts and subscriptions, Datarails Spend Control centralizes spend data, reconciles contract terms vs. payments, and delivers AI-powered insights to help finance teams save money and make smarter decisions.

- Contract centralization
- Cost optimization
- ERP integration

Make the CFO's office the home of business insights
