

# Introducing the new Brightpearl and Sage Intacct integration

Connect your retail operations and financials in one seamless workflow.

## Connect operations and finance in real time

- Bring Brightpearl and Sage Intacct together to simplify how your business runs day to day.
- Powered by [b.solutions](#), this new integration removes manual processes, automates key financial tasks, and gives you real-time visibility across your business.
- With Brightpearl managing your operations and Sage Intacct as your financial system of record, you can scale with accuracy, control and confidence.

## Key benefits

Built and maintained by [b.solutions](#), a trusted Sage integration partner, for reliable and scalable performance.

### Retail operations built for Sage Intacct

Combine the power of Sage Intacct with Brightpearl's retail operating system to manage inventory, orders, fulfillment and purchasing in one place.

### A seamless, real-time flow of data

Automatically sync customers, suppliers, inventory, invoices and payments between systems, giving you up-to-date visibility while reducing unnecessary manual work.

### More flexible, detailed reporting

Use Sage Intacct's flexible dimension structure within Brightpearl to create more accurate financial and operational reports and insights.

### Automated financial processes

Automate journal entries, transactions and reconciliation to save time, reduce errors and keep everything accurate as you scale.

## How Brightpearl and Sage Intacct work together
