# Stop managing Accounts Receivable manually.

Get paid faster, reconcile automatically, and keep your books accurate, without re-keying a single record.

## How it works

- ✓ **Invoices sync in.**  
Open invoices pull from Sage Intacct automatically. Amounts and due dates update in real time.
- ✓ **Customers pay.**  
Customers pay through your branded portal by ACH, credit card, or installment payments. Partial payments supported.
- ✓ **Payment status posts back.**  
When customers pay, the status, deposit, and any credits write back to Sage Intacct. Accounts Receivable, General Ledger, and Cash Management stay current.
- ✓ **Collections run on autopilot.**  
Auto-Pay rules collect on schedule. Automated reminders go out before, on, and after due dates. Your team stops chasing and starts closing.

### Bi-directional sync, built in

Invoices, payments, and statuses sync on both platforms in real time. No manual updates ever needed.

### Supported in US and Canada

Full support for MSPs across the United States and Canada with no regional restrictions.

### Get live in under an hour

No complex setup or data mapping required. Most partners are up and running the same day.

### SOC 2 Type II compliant

Cloud-hosted and secure, built to scale from \$1M to \$100M+ without system changes.

### From \$199/month.

No setup fees for Sage Intacct Marketplace partners. Available on monthly or annual terms.

### Platform and people, included

A dedicated onboarding and live partner success team works with you from day one, not behind a ticket queue.
