

**Software for global e-invoicing
and VAT e-reporting made easy**

Why e-invoicing compliance matters to customers

Tech where it counts. **Human** where it matters.

The challenge

The EU's ViDA initiative and global mandates demand real-time e-invoicing and real-time reporting for B2B transactions by 2030.
Failing to comply can result in fines, penalties, and inability to process invoices for payment.

Fragmented mandates

Every country with a mandate has its own schemas, formats, networks, reporting flows and clearance requirements.

Short runways & deadlines

Mandate timelines are compressing. Missed readiness can block invoicing and expose customers to penalties.

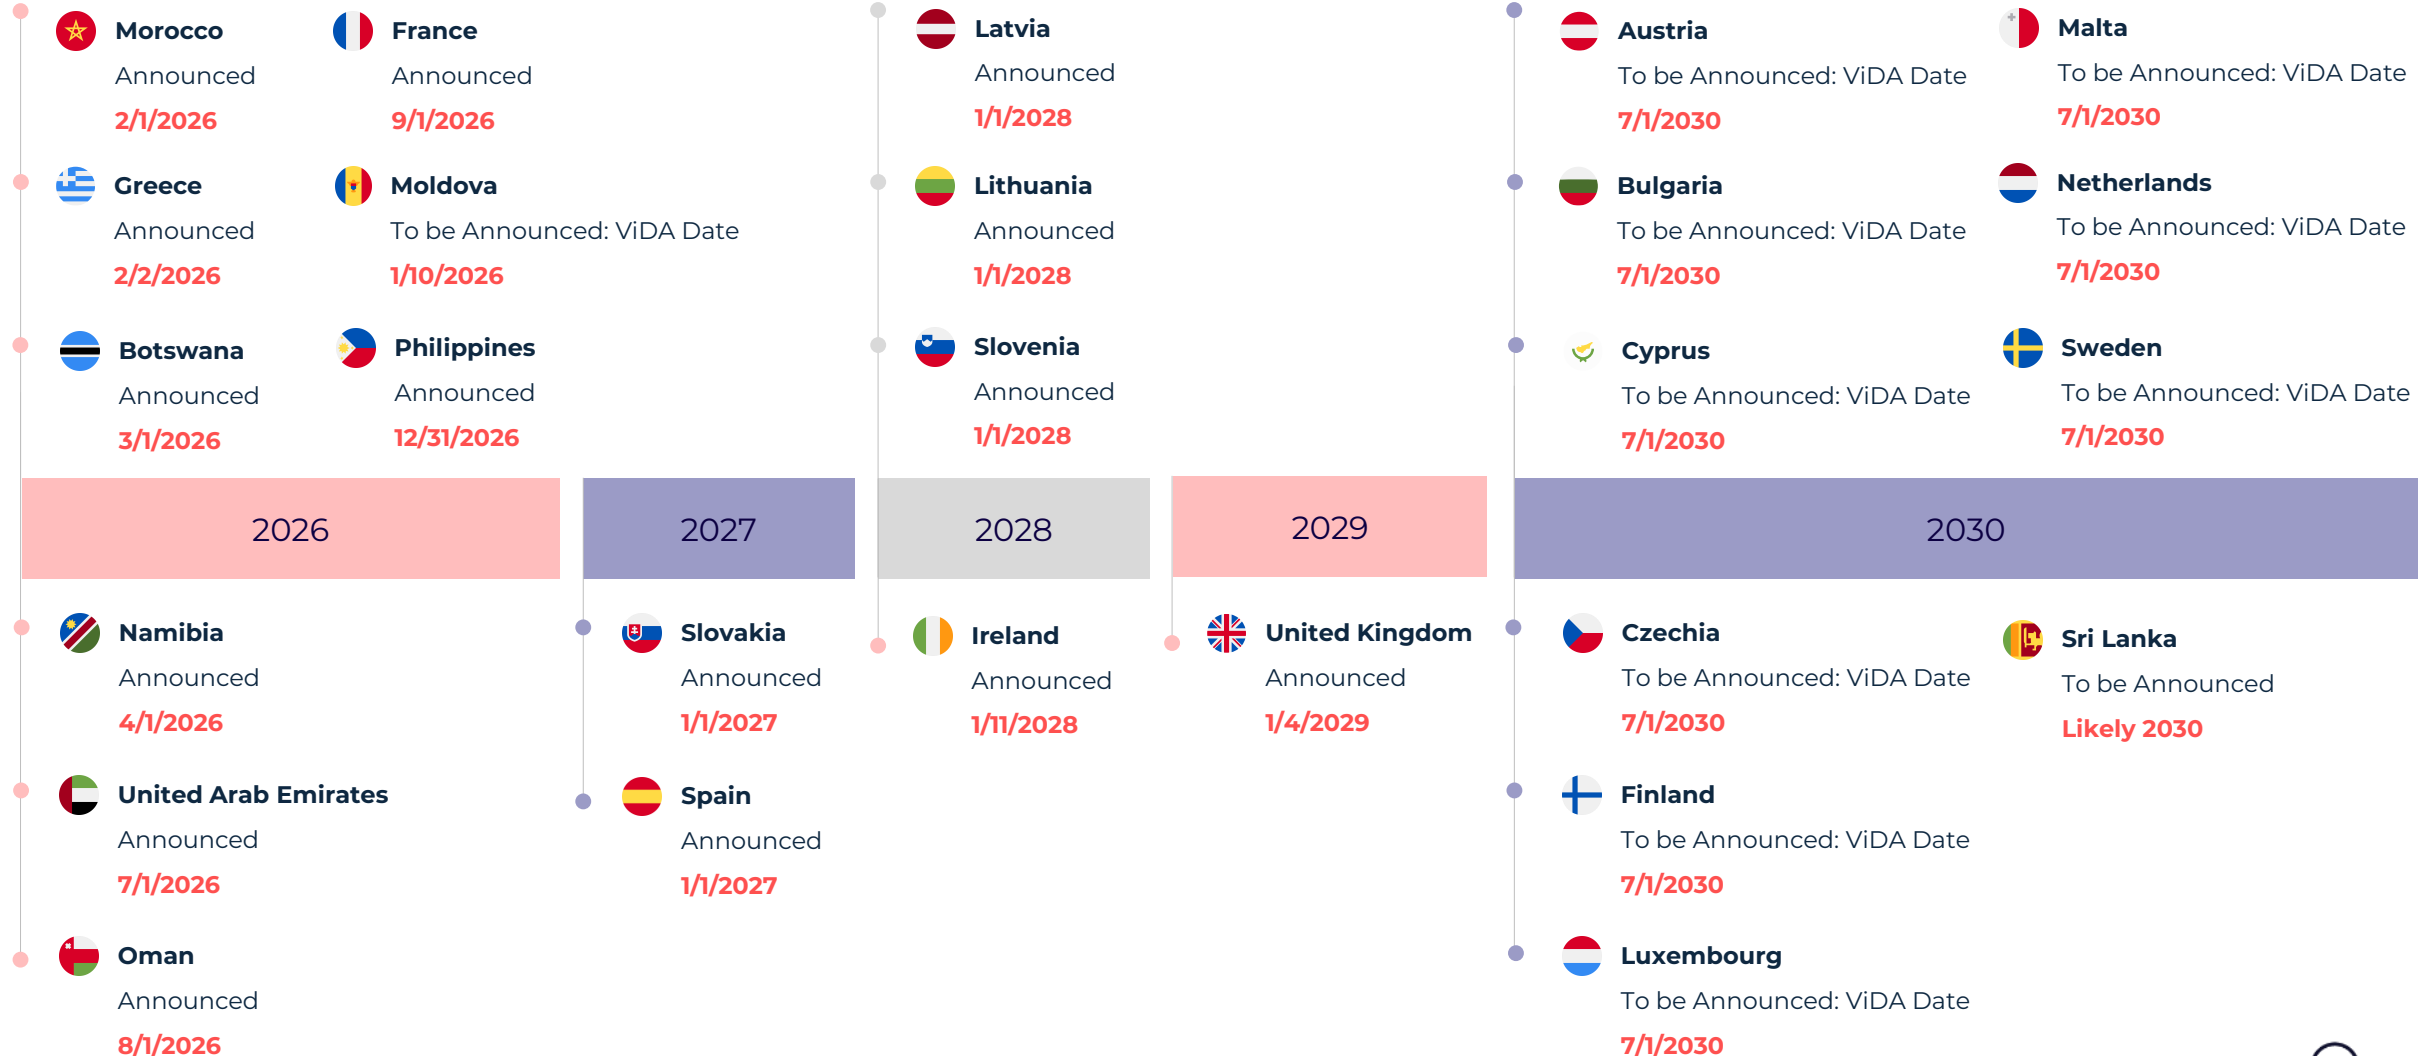

Management overhead

Per-country compliance consume scarce resources and pull teams away from activities that drive revenue and profit

Customers need one scalable compliance layer that can absorb changing country mandates without forcing finance teams to rebuild processes country by country.

Live & Upcoming B2B Mandates

B2B Global Mandate Coverage.

How eezi **works**

Tech where it counts. **Human** where it matters.

Meet eezi

eezi automates global e-invoicing and VAT e-reporting compliance at scale
with minimal disruption to existing finance systems & powered by VAT IT's world-leading expertise.

#1

e-Invoicing Software of 2024 —
TaxTech 500

Purpose-built — not retrofitted from legacy EDI systems. Developed entirely in-house by VAT IT.

eezi e-invoicing **Data Flows**

- AR Sales Invoice
- AP Purchase Invoice

Inside the **eezi** layer

RSM generates the invoice. eezi handles what happens next.

✓ **Translations**
Local language formats.

✓ **Digital signatures**
Country-specific signing.

✓ **QR codes**
Where mandated.

✓ **Pre-clearance validation**
Catch errors before submission.

✓ **Status tracking**
Real-time invoice journey.

✓ **Gen-AI error handling**
Interpret, Translate, Resolve.

✓ **Archiving**
Full audit trail.

✓ **Human-readable output**
For AP teams & clients.

Our edge

Cost efficiency	Purpose-built automated tech creates lower management costs.
Platform architecture	Unified software designed for scale and standardization. Language translation support.
Integration flexibility	Flexible integration: 2-way API, advanced SFTP and/or manual options.
Global coverage	Scalable, global mandate coverage through single invoice structure and managed rules framework.
Onboarding and support	Faster deployment through flexible integration options with dedicated hyper-care specialist support.
Management	AI error handling, automated issue resolution, fewer manual interventions and rejected submissions, lower compliance risk through audit-ready records. Better visibility into invoice status, exceptions.

Tech where it counts. Human where it matters.

our features

Cloud-Based Dashboard

Real-time status, exceptions, acceptance and audit trail visibility

Decades of Experience

Ongoing expert support.
Stay ahead.

Certified

PEPPOL, ISO 27001,
France PA, C5 and GENA

AI-Driven Error Handling

Understand and resolve errors before they impact compliance and cash flow

Global All-In-One Solution

60+ countries supported.
One solution for e-reporting & e-invoicing mandates across jurisdictions
Stay compliant as mandates accelerate

Transaction Agnostic

AP & AR workflows
B2B, B2C and B2G transactions

Integration

Tailored integration options
Dedicated integration team

An important **message...**

Don't wait for every local deadline. A global approach lowers risk, reduces duplicated work and allows a phased rollout before invoice or payment flows are affected

- ❑ Stay compliant at scale without adding country-by-country processes
 - ❑ Lower AR/(AP) processing cost through automation
 - ❑ Reduce exceptions and speed up approvals
 - ❑ Maintain audit-ready records

Global compliance with **VAT IT**

Tech where it counts. Human where it matters.

One global **solution**

EEZI

e-Invoicing

60+ countries. PEPPOL & GENA certified. #1 e-invoicing software 2024.

ABACUS

VAT Compliance

Registrations, filings, dashboards across 100+ jurisdictions.

ABACUS

US Sales Tax

All 50 states. Combined VAT + sales tax on one platform.

CLOUD

VAT Reclaim

Recover foreign VAT across 57+ countries. Success-fee model — zero upfront.

**End to end solution across the indirect tax ecosystem.
Best of all, recoveries through VAT Reclaim could end up funding the full stack.**

Tech where it counts. **Human** where it matters.

**We're ready
when you are**

Tech where it counts. Human where it matters.
