MakersHub

Bring AI-Powered Efficiency to Your AP Process in Sage Intacct

MakersHub integrates seamlessly with Sage Intacct to automate accounts payable—from bill intake through final payment—with real-time syncing and full visibility into your spend.

MakersHub enhances Sage Intacct with intelligent AP automation. We capture bill data (down to the line-item level), apply GL codes and dimensions, route bills for approval, and push everything into Sage Intacct—bills, payments, and supporting documentation. No manual duplicate entry. No reconciliation headaches. Just accurate, streamlined AP that scales with your business.

Key Integration Benefits

Bi-Directional Integration

Pushes approved AP bills, payments, and attachments into Sage Intacct, while pulling in key master data (vendors, GL accounts, departments, etc.).

AI-Powered Bill Capture

Extracts all bill fields and line items with 99%+ accuracy, including GL coding, job/project tagging, and dimensions.

Customizable Approval Workflows

Route bills by vendor, entity, department, or amount threshold—ensuring compliance without bottlenecks.

Real-Time Spend Visibility

Track costs the moment a bill is entered—not after it's paid—so you can manage budgets with confidence.

Scales With Your Business

Supports high bill volumes, multi-entity organizations, and complex approval needs, all without adding headcount.

Who It's For

Businesses using Sage Intacct that want to.

- **Eliminate manual AP work**
- **Improve GL and project-level cost accuracy**
- **Speed up bill approvals and payments**
- **Support growth without hiring more accounting staff**

Experience intelligent AP automation built for Sage Intacct.
