

ACCOUNTING INTEGRATIONS FOR SAGE INTACCT

AUTOMATED INVOICE SYNCING FROM ENGINE TO SAGE INTACCT

Engine's Accounting Integrations help finance teams eliminate manual invoice exports and keep travel spend accurately reflected in Sage. Configure it once and let Engine's automated, trip-level transaction routing and expense coding do the rest. Engine's Sage integration is configured using your unique Sage setup, so it fits seamlessly into existing accounting workflows.

THE PROBLEM

Today, many teams manually export invoices from Engine and upload them into Sage. This process is time-consuming, error-prone, and creates reconciliation and compliance risk—especially as travel volume grows.

KEY BENEFITS

Automated statement sync

Eliminate manual uploads and spreadsheets.

Flexible mapping

Align Engine invoices to your existing accounting structure.

Finance-ready visibility

Automatically code Engine invoices to the classifications you use.

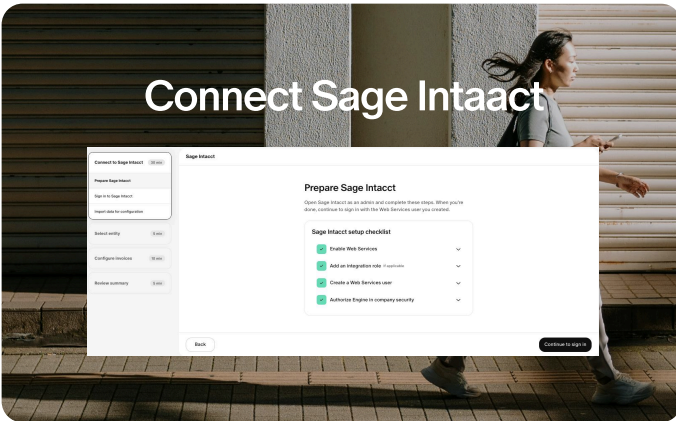

Built for Admins & finance teams

Clear status, error handling, and control from one dashboard.

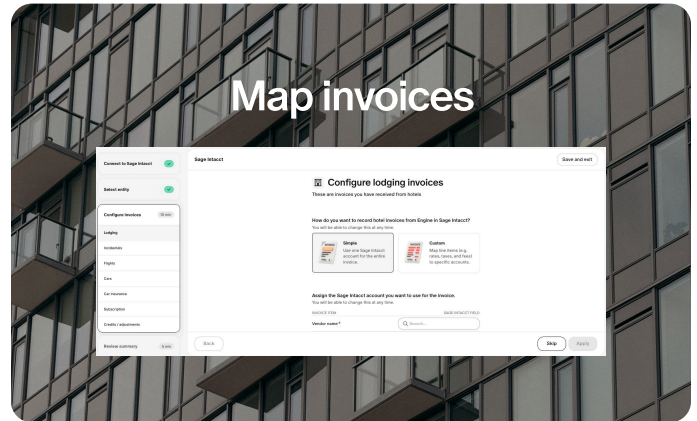

HOW IT WORKS

Connect Sage Intacct

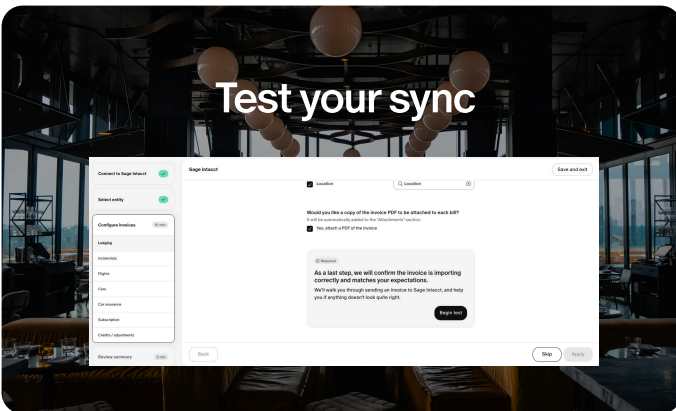

Admins are guided through a secure, self-serve Sage authentication setup from Settings → Integrations.

Map invoices

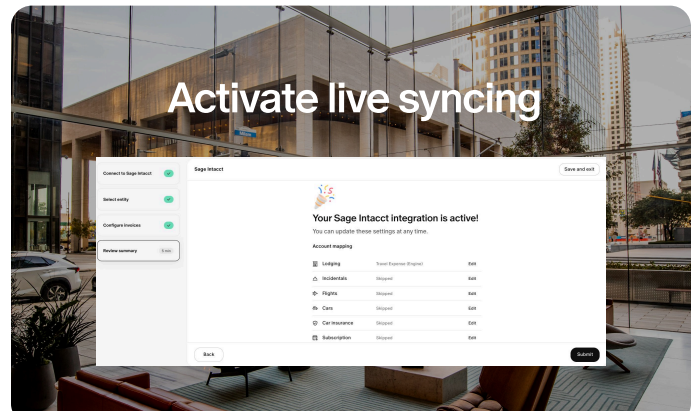

Choose how Engine invoice types and line items map to your unique accounts and fields in Sage.

Test your sync

Run a test invoice to confirm mappings are correct.

Activate live syncing

Turn on automated invoice sync and monitor status from the Integrations dashboard. Save and exit any time. We'll email you updates on your integration status.

DESIGNED FOR GROWING TEAMS

Accounting Integrations are ideal for teams that manage increasing travel spend and need Engine to work seamlessly with their finance systems.
