

Nomos One for Sage Intacct

Purpose-built lease accounting and lease management, integrated with Sage Intacct

Lease Accounting & Lease Management

IFRS 16 and AASB 16 compliant

WHAT IS NOMOS ONE?

Nomos One is a cloud-based lease accounting and lease management platform built for finance and property teams managing lease portfolios of any size or asset type. It centralises lease data, automates IFRS 16 and AASB 16 calculations, and gives teams real-time visibility across property, vehicles, equipment, and any other contract type, all in one place.

Finance and property teams rely on Nomos One to replace manual, error-prone spreadsheet processes with a single source of truth. Automated calculations, event reminders, and audit-ready disclosure reports mean less time chasing data and more time making informed decisions.

WHO IS IT FOR?

Nomos One is built for CFOs, finance managers, and property teams at organisations that manage lease portfolios and need a structured, scalable solution that meets auditor expectations and board-level reporting standards.

It is particularly well suited to businesses that have outgrown spreadsheets and need IFRS 16 or AASB 16 compliance without the complexity of enterprise software. Customers span retail, healthcare, logistics, local government, professional services, telecommunication, aviation and more. From growing mid-market companies to large, multi-site enterprises.

SAGE INTACCT INTEGRATION

Nomos One integrates directly with Sage Intacct, connecting lease journals to the general ledger without manual intervention. Journal entries flow automatically from Nomos One into Sage Intacct, eliminating manual data entry, reducing reconciliation errors, and keeping lease accounting data in sync with financial reporting at all times.

For Sage Intacct users, this means IFRS 16 and AASB 16 compliance is handled end to end within a connected ecosystem. There are no exports, no manual uploads, and no version control issues. Nomos One handles the lease-specific complexity — calculations, schedules, disclosures — while Sage Intacct remains the system of record for the general ledger.

The integration is purpose-built for Sage Intacct customers who need a reliable, dedicated lease management solution without adding complexity to their existing workflow.

KEY CAPABILITIES

Centralised lease repository	Automated IFRS 16 and AASB 16 calculations
Custom reporting and dashboards	Automated event reminders and alerts
Audit-ready disclosure reports	Sage Intacct journal entry integration
Full document storage and retrieval	Multi-currency support
Lease modification and reassessment tools	Configurable fields and user permissions
