# RubiCube for Sage Intacct

Billing, inventory and purchasing for F&B and manufacturing, synced with Sage Intacct.

## WHAT RUBICUBE DOES

### Billing

- Table management and kitchen display
- Offline billing across multiple outlets
- Menu modifiers and barcode scanning

### Inventory

- Recipes and bills of materials
- Stock by outlet, warehouse and kitchen
- AI demand forecasts and reorder levels

### Procurement

- Requisitions and purchase orders
- Goods receipts and approvals
- Spend tracked against budget

## HOW IT WORKS WITH SAGE INTACCT

### RubiCube posts

- Daily sales: AR invoice and payment per store
- A sales order for every ticket
- Daily inventory depletion
- Purchase requisitions and purchase orders
- AP bills when a receipt is approved
- Items and locations
- Reorder points and safety stock

Transactions → to Sage Intacct

Master data ← to RubiCube

### Sage Intacct provides

- Vendors
- Stock balances
- Purchase orders and receipts
- Inventory adjustments
- Budgets

## WHY INTACCT CUSTOMERS USE IT

- **No re-keying.** Sales and purchasing post on their own.
- **True cost of goods.** Recipe and BOM consumption flows to the ledger.
- **Faster close.** Operations and finance share the same transactions.
- **Less waste.** Forecasts set reorder levels before stock runs short or spoils.

## WHO IT'S FOR

Restaurants and QSR chains · Bakeries and cafés · Central kitchens · Food producers · Light manufacturing · Retail stores

## GETTING STARTED

**Live in two weeks**

The RubiCube team handles setup, training and support.

**Sage Intacct requirements**

Web Services with General Ledger, Accounts Payable, Accounts Receivable, Purchasing, Order Entry and Inventory Control.

**Works anywhere**

Runs in any modern browser, on desktop and mobile.

## SECURITY AND COMPLIANCE
