DeliverSense Accounting Automation Platform

- Dedicate Onshore Rep
- Free onboarding,
- Free test
- Free integrations
- Month-to-month subscription

Est. 2019 trusted by 8000+ businesses.

A modular platform that automates your most time-consuming complicated accounting processes. Each module integrates with any accounting system and is powered by agentic validation systems that detect and alert revenue leaks early.

Module	What it does
Delivery Analytics	Aggregates all your Delivery partner sales, payout entries, marketing results, and operational metrics in a customizable AI powered dashboard.
Delivery Reconciliation + Analytics	Fully automates delivery AR balancing, alerts on revenue issues and creates custom journal entries for any accounting system. The only system that fully explains delivery profitability.
+ Revenue Recovery	Onshore specialists identify eligible refunds and unpaid cancellations, submit disputes and report weekly recovery results.
+ Store Monitoring	Monitors DoorDash and Uber Eats store status with configurable SMS alerts and intelligent auto-reactivation.
+ Review Management	Detects negative customer reviews across marketplaces and generates thoughtful, brand-aligned responses to rebuild customer trust and strengthen online reputation
+ Promotion Management	Create location and brand-specific marketing campaigns. Location-level reporting across sales, spend, margin and effective ROI across all ads and promotions. Identify performance and reallocate the budget to the best-performing areas.
Cashless Reconciliation	Reconciles third-party cashless settlements (in-store + mobile) to POS records, isolating variances and automating fee, tax, and sale adjustment entries.
Cash Reconciliation	Balances POS cash to deposits or smart safes with running variance visibility, resolution chat and over/short entry automation.
Sales Tax Automation	Sales and use tax prep, file, pay automation with custom payment schedules, approval workflows, marketplace liability impact support, and auto liability GL reconciliation.
Ace Entry	Automates any journal entry or data aggregation process from daily POS sales to recording invoices to porting data into AI engines. Customized to your business and integrates directly with all major accounting systems.

+Add-ons require Delivery Analytics.
Reconciliations include up to 3 third-party sources. Additional third-parties/sources may be added for an additional fee.
