How it works

MarketMan is a cloud-based inventory and purchasing system designed specifically for restaurants and supply chains.

The desktop and mobile software comes with features designed to streamline and simplify essential inventory and purchasing operations including stock taking, purchase ordering, invoice management, food costing, vendor management, reporting and more.

Uses w/ Intacct

MarketMan is a great resource and value-add to expand functionality and save money. Automate your AP.

MarketMan offers ingredient level tracking, commissary and warehouse management, production planning, as well as invoice scanning and vendor integrations.

Automate AP and export all invoice details to eliminate manual data entry. Save time and eliminate paper.

Integration Benefits

MarketMan is available in the app marketplace. With a one time sign-in, all menu and sales data flow into MarketMan!

- Cut over-ordering, never have an eighty-six
- Recipe Costing: plan and budget your menu
- Shelf to sheet inventory counts with a mobile app
- Scan your bills using a mobile app

How does it help?

- Save time. Save money. Increase organization.
- Reduce food costs by 5%
- Consolidate Inventory, POS, and supply chain
- Seamless integration with hundreds of mutual customers already using the platform successfully.
- Live updates on menu item profitability and inventory item reorder points sent straight to your phone.

How much does it cost?
Starts at \$149 USD/month per location
