

Auto-spreading and real-time data from accounting systems for:

Loan Origination

Use Strongbox connections to underwrite faster and price risk more effectively

Loan Monitoring

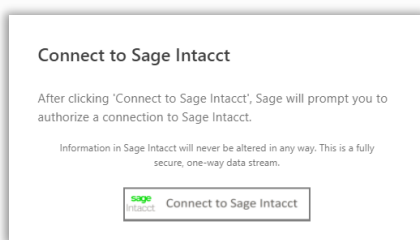

Use Strongbox for one-click submissions to monitor performance for key indicators of default.

How It Works

1

Your customers connect to Sage Intacct.

2

Data is extracted, normalized and analyzed in minutes

3

You gain instant access to auto-spread financials and cash flow analysis.

Key Features

- ✓ A simple, one-click connection experience for your customers
- ✓ Instant financial and cash flow analysis + metrics
- ✓ Intelligent Account Mapping for financials
- ✓ Flexible outputs: Ready-to-use financial workbooks (XLSX) or data via API
- ✓ Quick implementation

Three ways to implement

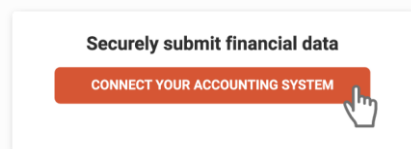

Direct API Access

Gives you full integration and customization into your existing application or service.

Strongbox Widget

Insert Strongbox into existing workflows, enabling a one-click connection for your customers.

“No code” White-labeled Portal

We brand a web portal you can send to your customers to easily connect their accounting system.

You control the branding, colors and copy to align with your own digital customer experience.
