Welcome To E-Link

Your Sage and Adobe Commerce/Magento integration solution, saving you time and money

E-Link offers a **one-way sync** between Sage Intacct and Adobe Commerce, formerly known as Magento. It displays **Sales Orders**, **Invoices**, and **Payments** in Business Partner Portals. It reduces the number of Customer Service phone calls and **reduces or eliminates errors from manual data entry**.

sage Intacct → **E-LINK** Sales Orders Invoices Payments → **Adobe Commerce Cloud** (formerly known as Magento)

Benefits

- Reduces Customer Service Calls
- Reduces Data Errors & Manual Data Entry
- Increases Customer Viability into Orders
- Provides Real-Time Transaction Data
- Provides Customers with a Single Source for Transaction Information

With E-Link, it's easy for companies to create custom **Business Partner Portals** for customers. Customers can use these self-service portals to review their Sales Orders, Invoices, and Payments.

Data will automatically sync from Sage Intact to Adobe Commerce, meaning that customers will have near real-time access to their order information.
