

Achieve Your Mission
with Automation,
Clarity & Efficiency

financeSYNC gives you the control to manage and automate your financial processes.

Harness the power of Sage Intacct and iMIS to save time, eliminate manual entry errors, and transform your iMIS data with Sage Intacct dimensions - **with no coding required.**

sage Intacct

iMIS

financeSYNC Tech Specs

✓ **Built for iMIS versions 2017 and Above**

financeSYNC is built with your iMIS upgrade path in mind. As you plan your move to the Cloud, financeSYNC will move with you, with no reimplementation required.

✓ **Built on API with Security in Mind**

Authenticates every request using credentials or session information.

Sender ID for XML Gateway (developer ID)
Company ID and login for specific company instance (user ID).

✓ **Replaces GL Export functionality in iMIS**

In addition to GL entries for financial transactions in iMIS, financeSYNC creates inter-entity transactions, and handles deferred income entries (when licensed for deferred income in iMIS).

✓ **Reduce or Eliminate Data Entry Errors**

financeSYNC has Quality Control built in- financial transactions will tie out between iMIS and Sage Intacct, with no duplicate entries, and follows the Business logic built in Sage Intacct, so your data is accurate.

financeSYNC Supports Your Mission

financeSYNC is tailored towards non-profits that aim high. Our system is designed to help organizations maximize their resources so they reach their financial goals with effective, powerful and flexible financial tools that streamline budgeting, executing and reporting operations.

✓ **Accessible Anywhere**

financeSYNC is based in the cloud and can be conveniently accessed with an internet connection from anywhere.

✓ **Fully Customizable**

Tailor and adjust the system to suit the unique needs of your organization.

✓ **Real-time Insights**

Get in-depth, real-time insights into what's happening right now. Identify opportunities and take corrective action with reports that range from top-level summaries down to the underlying transactions.

✓ **Cost-Effective**

Allow the system to pay for itself through reduced costs, improved performance and increased efficiency.

Start the process and reach your financial goals faster.

Implementation of financeSYNC takes **three-to-four weeks**, depending on your current system.
