PRODUCT SHEET

Nectari for Sage Intacct

One solution for business intelligence and data management.

Nectari, also known as Sage Enterprise Intelligence (SEI), is a fully cloud-enabled, easy-to-use, self-service Business Intelligence and Data Management solution. Nectari empowers users to make better informed business decisions based on enterprise-wide data. The consolidation of Sage Intacct data with other business solutions is made simple, thanks to Nectari's pre-built analytics and reports. Users can start benefitting from the solution on day 1 of deployment. Nectari provides access to meaningful and secure information while reducing costs and improving business performance.

Integration

Hit the ground running with pre-built Nectari data models, reports and dashboards for Sage Intacct ensuring a fast deployment and quick return on investment. Embed Nectari directly inside Sage Intacct for seamless integration.

Multiple Data Sources

Access and manage enterprise-wide data from multiple sources and locations with a process that blends data and prepares it for analysis and reporting in Nectari. Save time and reduce costs traditionally associated with manually managing data and make business decisions based on data that you can trust.

Excel Add-In

The Excel Add-In seamlessly integrates Nectari capabilities into the familiar Excel interface. Access dynamic data in real time, with the same level of security as Nectari. Create flexible ad-hoc reports by combining data from different departments into a single worksheet with the ability to drill-down. Create and share reports that are automatically refreshed with the latest real-time information. Out-of-the-box financial reports in Excel for Sage Intacct are available.

Sage Tech Partner Plus

Migration

Nectari's ready-to-use migration processes from Sage 50, 100, 300, etc. to Sage Intacct allows you to bring your existing data from your current ERP system (i.e. customers, vendors, AP, AR, GL, and more) to Sage Intacct with ease. Save time by eliminating manual data entry and manipulation, and facilitating data validation.

NECTARI DASHBOARD

Business Intelligence
