

INTEGRATOR PLUS™

INTEGRATION + INTELLIGENCE + INSIGHTS

IntegratorPlus™ increases productivity by as much as 30% by providing automated data synchronization between MS Dynamics CRM and Intacct.

INTEGRATOR PLUS™

INTEGRATION + INTELLIGENCE + INSIGHTS

IntegratorPlus extends your cloud solutions by delivering preconfigured integrations between Microsoft Dynamics CRM and Intacct. Built on the Microsoft Azure platform, this subscription-based cloud solution allows you to harness the power of two best-in-class software applications. IntegratorPlus transfers critical data such as *Customer, Customer Address, Inventory, Pricing, Sales Order* and *Sales Invoice* information so that updates in one system will instantly update the other.

IntegratorPlus delivers greater business intelligence by presenting a 360° view of your critical customer and financial information. Increase productivity by streamlining business processes and eliminating manual reentry of customer and order data.

IntegratorPlus increases business insights by allowing you to access your data from anywhere, anytime using any PC, smart phone or tablet. Your teams get one, single view of all your business information enabling them to make better informed and more timely decisions.

KEY BENEFITS

- » Eliminate the maintenance of redundant customer data, inventory, pricing, and sales order information in multiple systems or Excel spreadsheets.
- » Make it easy for sales executives to verify pricing and submit sales orders while at their desks or on the road without leaving Microsoft Dynamics CRM. Orders they submit in CRM will automatically be created in Intacct.
- » Automatically update Microsoft Dynamics CRM with the latest billing and payment information from Intacct.
- » Save time and money by streamlining the processing, reporting, and transaction times for your finance and revenue teams.
- » Dramatically improve collections and cash flow by providing your sales team with real-time financial information about customers from within Dynamics CRM.
