Sage Intacct with BigTime seamlessly syncs your projects, employees, financials, and accounting data to provide a single view into your entire business.

Efficiency
Streamline your processes with tools that work together, pulling all the information you need in each solution.

Accuracy
Eliminate risk for error with manual entry and time-consuming reporting.

Visibility
Gain full transparency into your business' financial health, enabling you to efficiently predict revenue to better manage operations and continued growth.

Flexibility
Set up the integration to work for you - catering to your firm's way of business andhow you enter time, expenses and billing.

Sage Intacct Integration

BigTime improves your firm's accounting throughout the entire billing cycle

Automate Information

Further optimizing your workflow with information that seamlessly syncs means no more manual data transfers or double entry on all things time, expenses, and invoicing.
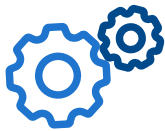

Bill Faster

Invoices and payments that work together. Create your invoices in BigTime and have them appear directly in Sage Intacct. Take it one step further with BigTime Wallet payment processing.

Make Smarter Financial Decisions

With more complex data and real-time insights, make more informed decisions on your firm's revenue projections.

Program It To Work For You

Determine settings for posting and importing data with default accounts, default items and locations for posting to Sage Intacct, and other various settings.

Integrations that work.
