Increase Efficiency and Peace of Mind

Eliminate the manual entry, errors, and headaches that come from ineffective payroll technology, and drive a better employee experience. Minimize manual tasks, save time, and have peace of mind knowing your employees are getting paid correctly and on time.

“The biggest return on investment (ROI) I’ve seen with the switch to Paylocity is my time. Payroll and expenses can be done in 20 minutes – which is incredible.”

– President and COO, High Road Logistics

Customize Your Payroll

Work with our experts to configure check types, general ledgers, time off accruals, and reporting to reduce admin effort and allow for quick, actionable decision-making.

Reduce Manual Data Entry

Hours, dollars, and labor allocations flow directly into Payroll from Time & Labor.

Automate Processes

Default configurations and overrides automate manual steps and ensure completeness of payroll data. Automatic calculation of prorated and retro pay saves time and effort.

Offer On Demand Payment

Allow employees to request a portion of their earned wages before payday. This provides employees increased financial flexibility—with zero impact to your payroll process.

Ensure Paycheck Accuracy

Trust that your payroll is accurate with our Payroll Readiness Dashboard, a powerful tool that provides you with a comprehensive overview of your critical payroll tasks well ahead of your processing day. Let our automatic payroll audits act as safeguards and call out any unexpected data entry.

Easily Connect to Other Business Systems

Automatically transfer information on 401(k), retirement plans, and benefit files with preferred vendor(s) via easy integration or unlock custom integrations with open APIs.

Ease Tax Compliance, Regardless of Location

Tax geolocation can audit each employee to ensure they’re set up to pay the correct taxes based on their location.
