

# Finally... Software Built for Subcontractors Working with Production Home Builders

## SubAssist protects your business from costly, inaccurate POs while automating invoice creation and supply orders

### What is SubAssist

Built by the trades for the trades, SubAssist protects subcontractors' bottom lines on both ends of their businesses. By ensuring every Purchase Order is invoiced as contracted and errors are eliminated, SubAssist is a force multiplier for your office team. Unleash your tradespeople to do what they do best and leave the paperwork to SubAssist's automated processes.

### How SubAssist Works

#### Upload Your Builder Contracts to SubAssist

Digital versions of contracts with builders are stored in a common format.

#### New Purchase Orders Are Matched to the Right Pricing

SubAssist finds the right version of your contract pricing instantly.

#### POs Reconciled Against Digital Contracts

SubAssist automatically reconciles all builder POs against the correct contract version. Pricing mismatches are flagged for your team to review.

#### Accounting System Updated

SubAssist integrates with common accounting software for the Trades to automate sales orders and invoice creation.

#### Supplies Ordered Instantly When PO is Approved

Automated ordering through proprietary mapped material packs ensures all supplies are ordered the first-time, months before the installation date.

### Without SubAssist...

**90%** of Trades businesses do **NOT** reconcile all the Purchase Orders they receive from builders before executing the work and billing them

Your business may be risking hundreds of dollars with each Purchase Order

**30 minutes** The average supply order for a single draw phase takes over 30 minutes per job

Automating just 200 orders per month would save your business \$5,000 per month

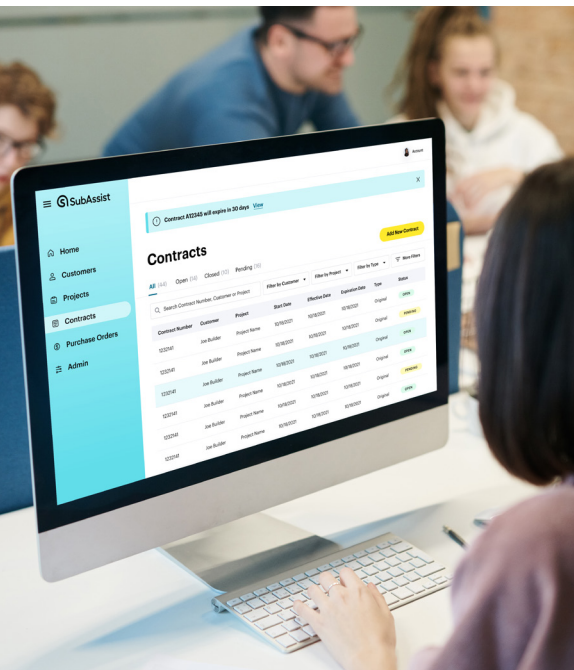

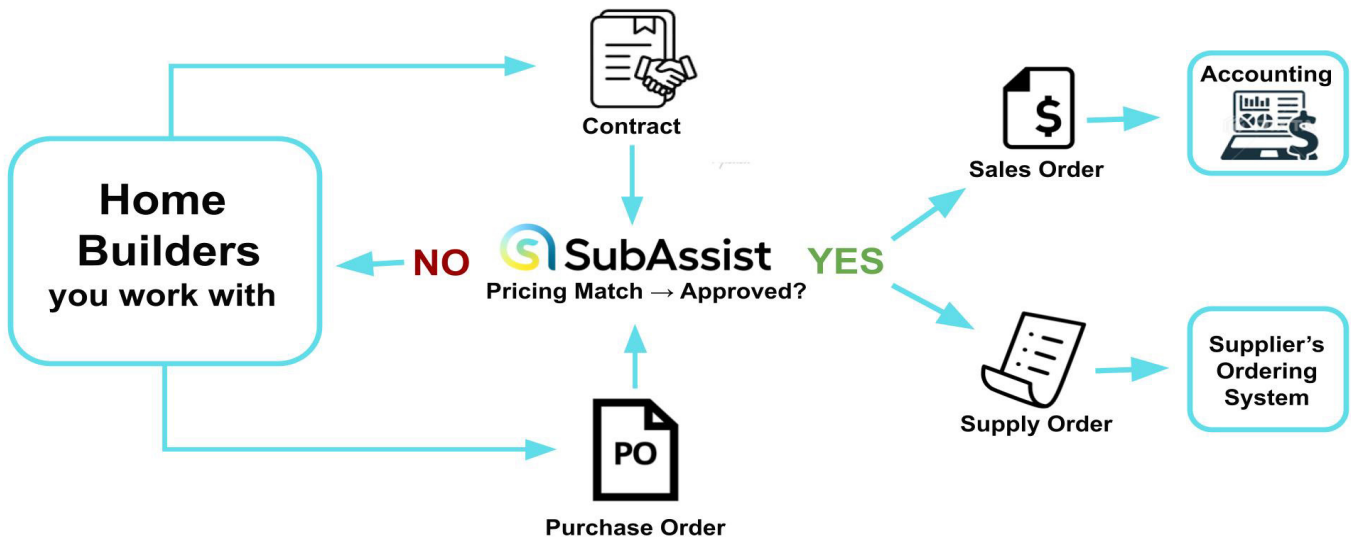

### WITH SubAssist...

**<1 second** for every order automatically placed with major suppliers

Your team can focus on their job and not calling suppliers to make orders, saving hundreds of hours each year

Based on our research of existing scenarios in the subcontractor supply chain

## Made for Trades People by Trades People

SubAssist was born out of a trade business owner's need to make his office team more efficient. His team struggled to ensure that every purchase order was accurate to the right contract pricing with production builders. Additionally, as his business grew, scaling the materials ordering process was generating waste and hurting his margins.

He knew there had to be a better way, so after not finding an automated solution, he built one. Now, his business saves over a million dollars a year. SubAssist is available for all subcontractors challenged by working with production home builders.
