FinQuery Software Management

Formerly StackShine powered by LeaseQuery

Software Management Simplified

Get full visibility into your organization's software applications to streamline software management, improve compliance and security, and identify meaningful cost savings.

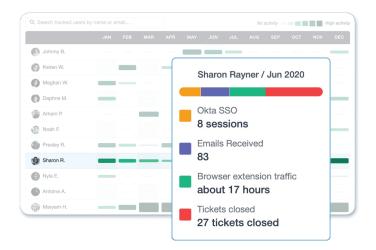

What is FinQuery Software Management?

The average organization has over 100 software subscriptions and counts SaaS in their top 3 non-personnel costs and operational blind spots. Discover, track, and manage your organization's software subscriptions in one simple platform. Our Software Management solution automatically detects your organization's software, *including shadow IT*, to address security risks, automate onboarding/offboarding, and identify ways your organization can cut costs.

FinQuery's Software Management ingestion engine gets deeper data on software use than the competition. Don't just see whether the software is being used, see what it's being used for and what kind of license is needed. Replace spreadsheets and email searches with a centralized dashboard where everyone can see exactly what software is being used. Automatically track new software, attach invoices, and remind your team when renewals are coming up.

FinQuery Software Management

Formerly StackShine powered by LeaseQuery

Subscription Calendar

See the timing of past and future software expenses for simple and accurate budgeting.

Key Features

Automated Alerts

Get notified of new subscriptions, upcoming renewal dates, unusual charges, and more for proactive software management.

Powerful Reporting

View spending, usage, activity, and licenses at aggregate and department levels for full visibility.

App Discovery

Software Catalog

Provide a centralized and

convenient way for employees

to request software access.

Automatically detect your organization's software applications eliminating shadow IT and mitigating software sprawl.

Employee Offboarding

Automatically remove employees from integrated software and see exactly where to remove looseend access.

File Management

Central repository for contracts, invoices, and files you need when reviewing a vendor.

Simple Collaboration

Invite workspace administrators to collectively manage vendors, uncover expenses, track budgets, and a lot more.

Security & Compliance

Visibility into software usage enables you to better monitor security & comply with data governance rules.

"We grew so quickly and before we knew it we had no idea what apps were being used by our team or what the total costs were. Solving this problem manually was going to be a nightmare, FinQuery's Software Management solution has been a game changer for us."

Alaena VanderMost, CEO at School of Motion
