Raken

Higher field adoption, better office insights.

Raken is the easiest app for construction field teams to document and collect data—straight from the jobsite. The office can see progress updates and insights in real time, streamlining communication and increasing visibility for every project.

Daily Reports
Complete professional, branded daily reports in minutes

Collaborator Reports
Automatically collect and combine subcontractor daily reports

Segmented Daily Reports
Submit multiple daily reports per project, per day for custom segments

Photo Management
Document jobsite progress with timestamped photos and videos, plus custom watermarks

Messaging
Communicate with project teams to resolve issues in real time

Time Tracking
Collect more accurate worker time with time cards, a mobile time clock, and kiosk mode

Production Tracking
Capture real-time field productivity data, including materials and equipment

Toolbox Talks
Browse digital topics, schedule talks, and capture attendee signatures

Checklists
Create and schedule custom checklists with flexible answer types

Observations
Add positive or negative observations to improve safety and quality with resolution tracking

Forms
Upload, annotate, share, and sign digital company and government forms

Incidents
Capture and classify incidents and attach supporting documents

Integrations
Connect Raken to your other construction and accounting apps
