Raken + sage Intacct

Inaccurate field data

Sage Intacct helps you manage your project finances and pay your workforce. However, getting accurate data from the jobsite to pay everyone on time can be difficult and time-consuming.

A streamlined integration

With our integration, you can easily capture time card data from the field and send it directly to Sage. That means no more manual entry or switching apps—and more time for improving projects.

Real-time production data
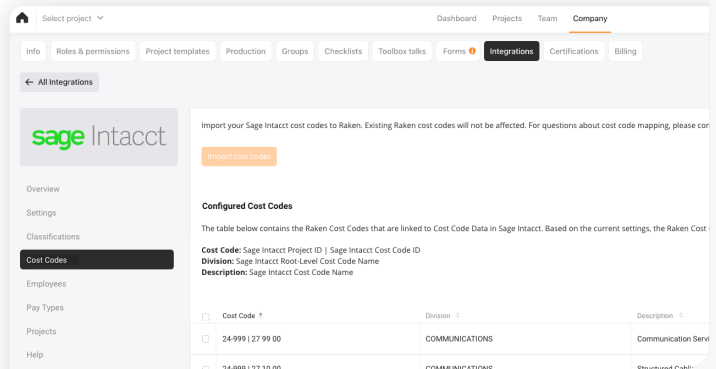

Better business decisions

Effective project management

1. Import data from Sage Intacct.

Sage Intacct records sync automatically, including:
- Employees
- Trades & Levels
- Projects
- Cost Codes & Cost Types
- Time Types

2. Collect field data with Raken.

Field teams use Raken for flexible time tracking with:
- Digital time cards
- Kiosk mode on a shared device
- Time clock on individual devices

Plus daily reports, safety, and document storage all in one app.

3. Export to Sage to run payroll.

Easily click to export time card details from Raken for:
- Higher data accuracy
- Faster payroll processing
- Better communication
