BlueSnap® | sage Intacct

Streamline Your AR Automation Process with BlueSnap and Sage Intaact

Get Paid Faster and Reduce Costs

Manual invoicing and the accounts receivable (AR) process can be riddled with inefficiencies, unnecessary costs and late payments. In fact, 93% of businesses receive late payments because of these manual processes, hindering 37% of companies from accurately forecasting that' their cash flow. About a third of companies have lost customers and contracts because of their manual AR processes

Using BlueSnap AR Automation and Sage Intacct together can help streamline your billing and payment processes, and your customers get more options for making payments — the bidirectional data flow ensures that all your records stay up to date. BlueSnap AR Automation expands on Sage Intacct's capabilities by offering:

Automatic Payment Procesing	Customer Portal	Payment Link	Customer Insights & Management

With BlueSnap AR Automation, you can automate all AR communications and manage billing for multiple business lines through one integration to get paid faster.

Improve Cash Flow
Streamline the quote-to-cash process and your workflows for more efficient invoice processing, recurring payments and collections.

Enhanced Forecasting & Planning
BlueSnap automatically tracks your invoices, giving you accurate data to properly communicate with customers. BlueSnap bidirectionally syncs with Sage Intacct for seamless reconciliation and reporting.

Enhance the Customer Experience
Enable customers to pay their invoices and balances, update billing information and view important account documents directly through a branded customer portal.

Boost Productivity
Automate each step of your billing, accounting and payment processes through one application — no coding required.

Find out how BlueSnap's AR Automation seamlessly integrates with Sage Intaact to streamline your invoicing and payments processes at BlueSnap.com.
