

# Integration & Automation, on-premise and in the cloud

Integrate Sage with all third-party Applications, Services, APIs and databases using our no code platform.

Modern organizations depend heavily on an increasing array of apps, systems and services to operate efficiently and grow their businesses but sharing data between them is one of the biggest challenges facing IT today.

Flowgear's Integration & Automation platform enables businesses of all sizes to shed the workload & complexity of App-to-App integration quickly & affordably.

Build powerful Application, Data and API integrations from a single interface in minutes, not months, using our no-to-low code Platform.

Create API's, innovative integration workflows or automate time consuming repetitive processes to increase productivity and profitability.
