# NexusCatalog
Streamlined Ordering of Products and Services

NexusCatalog is your company's single source for online electronic catalog ordering of all product and service purchases. The consumer inspired, easy-to-use navigation allows users to effectively browse and search among multiple vendor catalogs within your organization's approved supplier network with pre-negotiated prices. NexusCatalog provides a faster, more efficient purchasing method while offering the visibility and controls needed to contain spending.

One Centralized, Controlled, Integrated, Electronic Catalog Ordering System

To fit your unique business requirements, all purchasing data from the NexusCatalog interface seamlessly transfers to NexusPayables to complete the procurement cycle. NexusPayables enables sophisticated workflow for approval processing and POs are subsequently emailed or submitted electronically to suppliers for processing.

Highlighted Benefits of Using NexusCatalog:

- Ability to search for items across multiple suppliers and price compare

- Drives compliance to use preferred vendors

- Consolidates spend on individual vendors to drive larger discounts

- Controls spending by assigning suppliers to your locations so users only have access to their location specific catalogs

- Auto-populates Purchase Order during check out

- Compatible with supplier's existing shopping cart ("Punchout")

- Ability to create a custom marketplace specific to your company by accessing suppliers already in the NexusCatalog Community or by inviting new ones

- Ability to save "Favorite" items for faster ordering

- Detailed reporting of items purchased, including non-compliant purchases
