

iCOMPLEAT

The missing piece to maximize your Sage Intacct investment

Increase productivity and reduce spend with iCompleat Buy to Pay

Our AI and machine learning powered software not only **automates your accounts payable process**, it also unifies the company purchasing process with built-in online buying capabilities on marketplaces like **Amazon Business**.

We have combined industry accounts payable best practices and cutting-edge technology to provide our customers an average rate of 12% for savings on indirect spend, up to 90% productivity gains, 100% visibility of all POs, invoices, and real-time cash requirement reporting.

Real-time integration with Sage Intacct

Seamlessly connect your Sage Intacct account with iCompleat in minutes.

iCompleat synchronizes all accounting data from and to Sage Intacct including real-time approved invoice postings, so you don't have to.

Configure multiple entities, see all locations, suppliers, GL codes and live payment statuses from Sage Intacct and all invoice data from iCompleat, to name a few!

90% less manual processes

- Zero-touch AP process automation
- AI powered invoice data capture, extraction and coding by supplier and line item
- Full visibility of every invoice and payment status
- Automated invoice and PO matching

Smart and fuss-free approvals

- Simple drag and drop workflow creation
- Enterprise grade simultaneous approval routing
- Unlimited approval workflows, hierarchies and approval groups
- Dedicated mobile app for approvals on the go

Gain visibility and control of your purchasing

- Built-in online buying with Amazon Business delivers a seamless experience
- Avoid complex credit card reconciliations
- Digitize your company's purchasing process and make significant savings
- Create POs for approvals within a selected supplier list to control spend

Security first

- Remove risk of invoice fraud completely
- Multiple level data validation ensures correct payment information and stops duplicates
- iCompleat is deployed on Microsoft Azure local shards adopting UK, USA and Australian local data protection and tax requirements automatically.

Advanced data capture

Pricing

Compleat Software utilizes advanced AI and machine learning in purchase invoice capture and process automation, allowing iCompleat to be incredibly competitively priced.

So much so, that customers often cover the license cost from the savings incurred by adopting a unified digital purchase process and transparent online buying.

Contact us and we will assist in choosing the best pricing plan for your business. We will assess the volume and complexity of invoices received, users involved, and the company's spending habits. Our experts will make sure your monthly or annual subscription payment is the most suitable to fit your organization's needs.

Sign up for a personalized demo today!

Arrange a no-obligation product demonstration with one of our experts and tell us about your current accounts payable and buying procedures. Together we'll craft the right plan to transform your accounting automation processes. You will get to know the functionality in detail and have any of your questions answered.

COMPLEAT

About Compleat Software

Compleat is a spend management software provider for businesses globally. Its AI and machine learning solutions, iCompleat and eCompleat, provide SMBs and large enterprises with touchless, end-to-end invoice processing to help reduce the administrative touch points that slow businesses down and hinder growth. The customizable and self-service software presents an accurate, real-time and complete view of company finances across finance departments, procurement teams and budget holders.
