

ADRA SUITE

Simplifying Your Financial Close Process

YOUR CHALLENGE

The pressure to close your books faster is growing, yet you're still relying on legacy tools, namely spreadsheets and binders, to manage the financial close. You don't have visibility into the process. You run into obstacles you can't predict. Your manual processes are prone to error. Everyone is working harder to meet tight deadlines, increasing burnout and hurting morale.

With accuracy often sacrificed for timeliness, it should come as no surprise that only 28 percent of finance professionals trust their reported numbers.* It's time to move beyond spreadsheets.

OUR SOLUTION

The Adra Suite of Solutions by Trintech delivers three products that work together to automate and streamline work, improve accuracy and reduce risk, and better manage the detailed process of the financial close. The suite seamlessly integrates with many financial systems, such as ERPs, allowing you to close faster with confidence.

KEY BENEFITS

- Close faster with automation, saving time and money
- Create instant visibility and reporting that's only a click away
- Improve collaboration with a digital hub for your content and your team
- Simplify compliance with tracking and audit trails
- Define your work and reduce errors through agile project management

* Trintech survey of more than 300 finance managers in the United States and Europe who work at companies with sales of more than \$100 million.

The time we have saved through the automation of our processes has resulted in us being able to do more work to create value on a daily basis. We are very satisfied with our partnership.

— Protector Insurance

The road to a high-performance close is as easy as...

1. Automated transaction matching lets you focus on handling exceptions.
2. Matched transactions seamlessly integrate into balance sheet reconciliations.
3. Centralized checklists and documents provide full visibility and control of the entire financial close from start to finish.

The Adra Suite of Solutions is built for small and mid-sized companies. Its intuitive design ensures that each product is easy to learn and use. Since the entire suite is centrally hosted in the cloud, you can take advantage of our software as a service (SaaS) solution that is easy to implement, lower cost than traditional software deployment and scalable.
