

YayPay AR

Fast, Easy, and Highly Predictable Accounts Receivable Automation

Back office financial processes create a bottleneck for getting paid.

-  Collection tasks are manual, repetitive, and result in little activity.
-  Efforts not prioritized using data is wasted on low-value activities.
-  Manual cash forecasts are time consuming and unreliable.

YayPay is a cloud-based predictive AR solution that automates the collection activities related to each of your customers' accounts. You can replace all of your emails, post-it notes, and excel spreadsheets with YayPay's centralized CRM system for AR collections and management.

Intuitive for Small Businesses, Robust Enough for Enterprises

With YayPay, gain visibility at the click of a button to your AR pipeline health, priority accounts that need attention, and cash flow risks. Now, all AR tasks and reporting can be run by a single easy-to-configure administration console. Integrate YayPay directly into your invoicing platform to gain access to the following product features:

- automated collection workflow
- finance & sales collaboration
- real time cash management analytics
- calculated key metrics (AR aging, DSO, open invoices, etc.)
- complete clarity into all AR at the click of a button
- predictive cash flow analytics using machine learning

YayPay seamlessly integrates with Sage Intacct and multiple accounting, ERP, billing, and CRM platforms. If a pre-built integration is not available for your invoicing platform, we have an API available.

What if
you could
spend
30% less
time on
collecting
money and
get paid
30%
more?

Get paid faster today!

YayPay customers typically experience a decrease in Days Sales Outstanding (DSO) in the first 30 days.

Automated Collection Workflows

Easily configure and customize dynamic and intelligent workflows that automate manual tasks including payment reminders, internal escalations, and much more.

Organizational Alignment

Finance teams (especially collections) and sales teams are often not in alignment. YayPay's collaborative platform brings both teams together with easy to create workflows.

Real Time Customer Success

Unpaid receivables are the first signs of customer dissatisfaction. Introduce smart reporting to your finance department and drive customer success.

Dedicated CRM For AR

Streamline your AR process by leveraging our single point of record for all AR data. Get all AR information from your ERP, CRM, and other applications consolidated in one place.

Dynamic AR Aging Report

Real time reporting and crystal clear insight into your organization's AR.

Empower Your Customers

Your customers can easily view and download an invoice, make a payment, raise a dispute, or promise to pay all from their statements page.
