

Integrated Commerce in the Cloud for Sage Intacct

TrueCommerce is the most complete way to connect your business across the supply chain—integrating everything from EDI to digital storefronts and marketplaces to fulfillment and more—so you can do business in every direction.

BENEFITS

More Connected. More Supported.
More Prepared for What's Next.

- An unequalled range of commerce solutions for Sage Intacct, developed and supported by one trusted source—including integrated EDI, digital marketplace and storefront integrations, fulfillment automation and much more
- Robust EDI integration automates a wide range of sales order, remote warehouse and inventory documents, including advance ship notices (ASNs)
- Connect directly with over 92,000 trading partners on the TrueCommerce global trading network, with time-saving EDI mapping updates at no extra charge
- Unlimited, US-based support and free software updates

TrueCommerce makes EDI painless by providing businesses of all sizes with complete, end-to-end solutions that are easy to use, robust and affordable—along with market-leading support and services to ensure your success.

COMPLETE EDI SOLUTION FROM ONE TRUSTED SOURCE

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

Web-based, User-Friendly EDI Translation Software, called TrueCommerce Transaction Manager, converts business documents from raw EDI data (ANSI ASC X12 and EDIFACT standard) into a human-readable business form.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and Sage Intacct through the TrueCommerce Business System Plug-In™. This is achieved by processing EDI transactions through a collection

of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within Sage Intacct, as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can be easily added and seamlessly integrated with your TrueCommerce solution.

Support is a critical component of a complete, end-to-end EDI solution. Our Professional Services team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

Truecommerce EDI Solutions

DO BUSINESS IN EVERY DIRECTION WITH INTEGRATED COMMERCE SOLUTIONS FOR SAGE INTACCT

EDI is more than a way to comply with customer requirements. Integrating EDI with your Sage Intacct system can eliminate time-consuming, error-prone manual tasks, to accelerate order processing and improve supply chain visibility and customer satisfaction. TrueCommerce EDI includes powerful sales order, remote warehouse and inventory integration that's proven, affordable and easy to use—so you can meet all of your customers' EDI requirements. But that's just the beginning of what TrueCommerce integrations offer our customers!

CLOUD-BASED EDI

A cloud-based EDI integration hosted by TrueCommerce offers Sage Intacct users the benefits of anytime/anywhere, browser-based access, reduced IT costs and no maintenance, backup or update worries.

STREAMLINE ORDER FULFILLMENT

TrueCommerce integrates EDI with your Sage Intacct order management processes, including sales orders, invoices, shipments, advance ship notices (ASNs) and inventory update documents.

Businesses can also automate communication with 3PLs to fulfill orders faster and more accurately. For example, inbound EDI shipment documents automatically create shipments within Sage Intacct, including the package details. You can also automatically create outbound ASNs in Sage Intacct from inbound shipments.

AUTOMATED SAFEGUARDS ENSURE COMPLETENESS AND ACCURACY

To help improve data integrity, cut turnaround time on orders and reduce errors and chargebacks, TrueCommerce EDI ensures that required data is entered correctly and will notify you of specific invalid fields or missing data prior to sending transactions. It also validates unit pricing, purchase order numbers and items before processing EDI transactions to Sage Intacct.

EDI IS JUST THE BEGINNING!

To do business in every direction, Sage Intacct users need to move more data faster across more channels, maximize automation and eliminate manual effort. As the most complete way to connect your business across the supply chain, TrueCommerce offers an unrivaled choice of integrations and value-added capabilities:

Connect to Marketplaces—Including Amazon

Connect Sage Intacct to leading online marketplaces like eBay, Walmart, Google, AliExpress and nearly 100 other top marketplaces globally. Automatically exchange order, fulfillment, customer and inventory data between marketplaces and Sage Intacct—no more retyping. TrueCommerce can also integrate Sage Intacct with Amazon Seller Central or Vendor Central to move order and inventory data back-and-forth automatically between Amazon and Sage.

Connect to Storefronts

Connect Sage Intacct to leading online storefronts, including Shopify, Magento, WooCommerce and the TrueCommerce Nexternal eCommerce platform. Process online orders in minutes and automatically update pricing and inventory between your online store and Sage Intacct.

Connect Online, Phone and PoS Channels with Sage Intacct

Today's omnichannel marketplace calls for a flexible eCommerce solution that can process orders across multiple channels. The TrueCommerce Nexternal eCommerce platform can capture and manage orders from your storefront(s), B2B portal, Amazon Seller Central, phone and Point-of-Sale in one robust system—to streamline fulfillment for a stellar customer experience. Nexternal integrates seamlessly with Sage Intacct so you can automatically exchange order and shipping data without retyping, to scale your online business while reducing costs and errors.

Streamline Fulfillment across Channels

Automate and standardize fulfillment across all your channels with TrueCommerce Pack & Ship, our cloud-based, multi-carrier shipping solution. Pack & Ship helps expedite fulfillment to meet customer requirements, while cutting shipping costs and reducing errors and returns.

Automate Everyday Tasks

Import and export supply chain transactions at scheduled times with the TrueCommerce Scheduler™ add-on. To meet partners' labeling and packing requirements with one solution, the TrueCommerce Labeling add-on automates creation of UCC/GS1-128 compliant, barcoded labels, with label and packing list template updates included free. To integrate EDI with popular shipping systems like FedEx and UPS, choose the TrueCommerce Shipping Module.

TRUECOMMERCE EDI SOLUTIONS: A TOTAL EDI SOLUTION FOR SAGE INTACCT FROM ONE RELIABLE SOURCE
