

Effective Financial Management Requires Unified Data. Get Unified with DataBlend.

DataBlend is a cloud-based integration platform that makes it easy to seamlessly transfer data between the systems that drive your business. With DataBlend, your organization will benefit from real-time, big-picture insights that only comprehensive and unified data can deliver. With DataBlend's unique capabilities, you are able to integrate your mission-critical systems with Sage Intacct quickly and at lower cost.

Powerful Features for Sage Intacct Users:

- Easy-to-use wizard for quickly setting up connections and building end-to-end workflows
- Preview data in real-time as you build workflows
- Pre-built data transformations including filters, pivot tables, concatenate, flip sign, substring and many more
- Mappings through web tables – including the ability to create rules based on multiple fields
- Automated import and export of flat files via SFTP
- DataBlend agent for connecting to on-premise systems
- Push and pull data directly from Excel with DataBlend plug-in
- Ability to schedule key processes to run at any time
- Clean Sage Intacct exports including account attributes and other metadata (not just rollups)
- Automated delivery of email notifications and alerts to end users

DataBlend LLC offers a cloud-based integration platform as a service (iPaaS), designed for business users. DataBlend's intuitive workflow builder allows users to model and automate data flows between systems including corporate performance management (CPM), enterprise resource planning (ERP), customer relationship management (CRM), professional services automation (PSA) and more for more accurate and dynamic financial management, planning and analysis. DataBlend LLC is a joint venture of Carlson Management Consulting, the award-winning cloud financial solutions and services firm, and J2 Interactive, the healthcare IT services firm.

Pre-built integrations for all of the major cloud and local applications:

 sage Intacct

 Adaptive Insights

 salesforce

 OpenAir

 workday™

 bambooHR™

 paylocity

 Dropbox

And others!

 rootcapital®

"DataBlend saves time and reduces expenses by providing a more efficient way to integrate your ERP, CPM and other core financial and operational systems. You have less operational risks and more trust in your data quality. You also gain so much value from being able to combine financial with non-financial data that previously lived in siloed systems."

— Bryan Woliner
Senior Director, Finance & IT
