+ **sage** Intacct = 

PerByte has developed a seamless integration from Aptify to Intacct. Simply create and approve a batch in Aptify and automatically that batch will appear in Intacct for the accounting team to post.

Batches, Batches, Stop Manually Entering Batches (into Intacct)!

- Save time and effort between approving a batch in Aptify and having GL information in Intacct for financial analysis.
- Eliminate the risk of duplicates! The integration does not allow duplicate batches to post to Intacct.
- Use PerByte's pre-built integration to connect Aptify and Intacct; then sit back and watch the batches appear.
- Installation is fast and easy with the PerByte team involved throughout the process.

Investment

System Cost: \$8,000

- System & installation
- First year of support
- User documentation

Annual Support: \$1,600

- Intacct API License
- Inquiry response
- Troubleshooting

Your Aptify is starting to walk ... we teach it to talk.

PerByte offers a full suite of tools and add-ons to enhance your organization's tech stack. View more at perbyte.com/products.

Advanced Messaging System

Can you fire a Message Run when a field changes? How about updating an Aptify field when you send a message or ensuring that a message gets sent once but never twice?

Avalara Integration

Is your system prepared to handle sales tax on services? PerByte has partnered with Avalara to develop the only certified integration for Aptify users.

Forms System

PerByte's Forms System allows Aptify users without web development skills to create configurable forms on your e-Business website.
