

Flow expenses directly into Sage Intacct

Connect your Emburse Certify Expense data with an API-based integration

Certify's integration with Sage Intacct eliminates several frustrations of expense tracking by seamlessly linking the systems together. Rather than wasting time manually moving data between systems, the API-based connection syncs automatically. Your team is then free to focus on more strategic efforts, significantly reducing input errors, and continue trusting Sage Intacct as the single source of truth for all finance transactions.

Connecting your team to greater efficiency

Our API integration allows you to track against standard Intacct dimensions, giving your expense reports the level of detail you need.

CONSISTENT DATA SYNC

Daily syncs between Certify and Intacct keep your expense in check, allowing you to rely on Intacct as your source of truth.

USE INTACCT'S SETUP

Transfer your existing Intacct setup and settings into Certify to streamline administrative upkeep while eliminating double data entry.

DIMENSIONS SUPPORT

Use Intacct's standard dimensions (vendor, department, entity, etc.) to better track spend against cost centers.
