Product Features

GL field matching

Pull all of your GL Accounts, Departments, Locations, Classes, and Projects from Sage Intacct into Divvy to speed up and automate reconciliation.

Pre-coded transactions

Transactions that sync from Divvy to Sage Intacct arrive pre-coded with all fields you choose to integrate. Spenders easily code their own transaction from our award winning mobile app.

Auto Sync

Automatically sync your Divvy data each night into Sage Intacct, making month-end close easier than ever.

Optional Manual Sync

Admins can manually sync between Divvy and Sage Intacct through Bill.com as part of month-end close or they can choose to automate the process using daily auto sync functionality—whichever works best for you.

“The best parts of the integration are the elimination of manual processes that are prone to error and the massive amount of time it saves me. It allows me to push out my reports to stakeholders a lot quicker and has knocked a day off of my monthly close.”
