

GoCardless

A GLOBAL LEADER IN BANK PAYMENTS

About GoCardless

The union of bank debit, open banking and payment intelligence puts us in a unique position to give you back control of your payments. Take advantage of our full suite of payment intelligence add-ons:

- **GoCardless payments**
Our core solution enables you to collect and schedule payments via Direct Debit and via open banking powered Instant Bank Pay.
- **Payments intelligence add-ons**
With our payment intelligence add-ons, recover 70% of failed payments automatically and detect & prevent fraud.
- **Integration with Sage Intacct**
GoCardless, the only natively integrated Direct Debit provider, enables users to automatically collect and reconcile payments without leaving the platform

DocuSign

"GoCardless enables customers to authorize us to pull money from their accounts, so we can schedule payments at the optimum time. This is key to our popular autopay feature, which allows customers to save time by not having to manually approve and review all their invoices."

Courtney Chin
Director, FinTech Ops, Deel

GoCardless × Sage

GoCardless for Sage Intacct

GoCardless puts you in control of collecting payments directly from your customers' bank accounts using Direct Debit or via open banking powered Instant Bank Pay.

One source of truth

Automate the collection and reconciliation of payments on their due date without ever leaving Sage Intacct.

Stop chasing payments

Take control of unpaid bills. When your invoice is due, GoCardless automatically collects payment from your customer's bank account so you don't have to chase. Businesses get paid 47% faster.

Remove global barriers

Collect payments from customers around the world with the ability to collect Bank Debit in over 30+ countries and flexibility to settle in local or foreign currencies.

Get started with GoCardless

It's simple to attach GoCardless to your Sage Intacct invoices and collect payments from your customers. Just create a GoCardless account and connect it to Sage Intacct. After this, you can attach a GoCardless payment link to your invoices.

Safe and secure

Your customers' payments are fully protected if a payment is ever taken in error and customers are notified by email when a subscription or one-time payment is being taken.

Forget expensive fees

Bank-to-bank payments cut out the costs of card networks. The automation also greatly reduces the costs involved in chasing and managing payments, with some GoCardless customers reducing the cost of taking payments by 56%.

"Before GoCardless, our payment process was slow and expensive. It's now incredibly simple and cost-effective. I want to systemize everything; I don't want to be chasing payments every month."

Sam Caulton

Finance Director, Re-Leased
