

ExpensePoint®

Automated Expense Reporting

Happy Features Make Happy People

ExpensePoint is all about making expense reporting simple and fast and that makes for happy people.

RELIABLE RECEIPT READING

ExpensePoint fills out your expense for you. Just take a picture, and ExpensePoint does the rest. Unlike other systems that rely on OCR to read receipts, we believe that reliability and accuracy are crucial in this process. That is why ExpensePoint's **Receipt Reader** system utilizes the most reliable reading instrument – the human eye. It is accurate, detects errors, scribbled amounts, tips, and knows what everything means and where everything should go.

MILEAGE TRACKING

Your ExpensePoint **MileageTracker™** will track your mileage route using your mobile device's GPS and allows users to create a mileage expense with a single swipe. Each mileage expense has a copy of the routing information and maps viewable to users and expense approvers.

CREDIT CARD INTEGRATION

Credit card transactions can automatically be added to your ExpensePoint account with instant receipt matching. We can pull in your user corporate or personal credit card transactions from over 2500 banking institutions and automatically match receipts from your ExpensePoint **Receipt Wallet**.

EASY APPROVAL

The ExpensePoint mobile app or browser login makes it easy for Approvers to authorize expenses and receipts on the go. Approvers can see any out-of-policy expenses and can easily approve or decline single expense items or the whole report.

MULTI-LANGUAGE & MULTI-CURRENCY

As a truly global solution, ExpensePoint provides expense reporting in 14 languages and converts user-inputted expense descriptions from over 100 languages. In addition to that, ExpensePoint provides foreign currency exchange rates from over 150 traded currencies.

SECURITY & COMPLIANCE

Security and Compliance are at the core of what we do. We are SSAE-18 (SOC) audited and certified company, and as well we are a PCI-DSS (Payment Card Industry) compliant company and GDPR compliant. All this means; your data is managed and safeguarded at the highest level of global industry security standards.

Powerful Workflow and Accountability

WORKFLOW & POLICY MANAGEMENT

ExpensePoint can manage dynamic workflows from single approval to multi-level approvals. Maximize your control and Compliance with customized expense policies. ExpensePoint can provide unique workflows based on policies: exceeded dollar amounts, cost centers, project numbers, and expense categories, to name a few.

LIVE REAL-TIME REPORTING

ExpensePoint's **Analysis Manager** enables you to harness the power of real-time data providing up to the second live spend. Analysis Manager keeps you informed with over 36 management reports from detail, summary, bar charts to graphs.

ACCOUNTING INTEGRATION

ExpensePoint's **Automation Manager** allows for seamless '**Hands-Free**' expense data export and import, direct integration with a host of accounting systems: SAP, Dynamics, Quickbooks, Sage, and many more. Save time and money by eliminating manual data entry into accounting systems.

Approvers and Accounting can set policies and approval workflows that ensure seamless management and compliance. The increased visibility into all submitted expenses and receipts and the capacity for data analysis reports are invaluable.
