

Field/Home Services Warehouse Management

If your business provides on-location home or business installations or maintenance services (i.e. HVAC, Electrical, Solar, Plumbing, etc.) that requires any kind of inventory, you know how critical it is to have the Parts needed available in the truck or van.

Powerful Warehouse Management For Intacct

QStock Inventory provides the critical warehouse management capabilities that Field and Home Services companies need to:

- Update your financials with job invoice data automatically
- Provide usage visibility of truck inventory to the warehouse in real-time as parts are used at job sites
- Quickly replenish trucks with min/max truck and bin replenishment logic.
- Cycle count trucks using barcode mobile computers, unencumbered by paper, excel or desktops as you take action.
- Utilize your accounting and central purchasing system to buy goods on time.

Integrated Field Services Management

QStock's integration into ServiceTitan allows our customers to leverage ServiceTitan's front office capabilities like:

- Integrated CRM and Customer Service
- Capacity planning, scheduling, truck dispatch and routing
- Integrated in-field visual quote creation and payment capture that we tie into once it becomes an official job
- Integrated marketing and service management specific KPIs and dashboards.

Best Choices for Each Team

QStock allows you to tie together your front office operations of technicians and CSRs on ServiceTitan and back office warehouse deeply integrated with your financial system so that each team can focus on delivering their best
