

Native Intacct Integration

Built right into your Intacct screens, DocuPeak is a powerful, secure document management solution, complete with retention and archiving. DocuPeak can even automate the creation of transactions in Intacct to prevent double entry.

Increased ROI

DocuPeak increases the return on your investment in the Intacct Accounting solution, and saves you time and money in managing internal, supplier and customer documents. By automating paper driven business processes and eliminating file cabinets, organizations become green and save on labor and other paper handling costs.

User Friendly and Configurable

DocuPeak is a next generation electronic document management system (EDMS). Built upon latest technology standards, it is scalable and can be completely tailored to the way you work.

- Workflow Collaboration
- Electronic Forms
- Many Capture Options
- Secure Role-Based Access
- Document Indexing Automation
- Comprehensive Audit Trails
- Personalized Dashboard Interface

“

Our payables collection and payment approval process is far better organized and managed now. All imaged documents are in one, easy to access repository accessible to our internal and remote staff to view and work. We are saving on faxes, paper, mail and FedEx costs and time once needed for processing. I am confident that using DocuPeak will set our company ahead of our competitors.

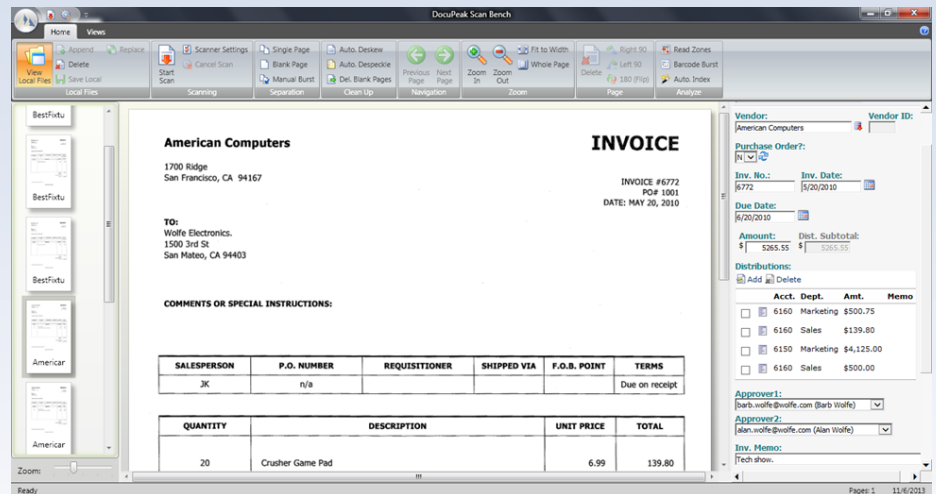

”

DocuPeak for Intacct

DocuPeak lets you extend your Intacct solution to include the critical front end pieces of your business processes. Digitize paper, automate AP, AR, field, or partner processes, and implement electronic forms. DocuPeak captures and delivers to Intacct the data that drives your business.

With Webiplex's DocuPeak document management solution, you can electronically manage all documents related to your business and automate your routing and approvals process:

- ◆ Automate the capture and classification of incoming documents.
- ◆ Automatically route documents such as AP invoices through a predefined role based review and approval process, including notifications and escalation procedures.
- ◆ Integrate all documents to the associated transaction within Intacct for synchronization of key document data, and viewing.
- ◆ Maintain an audit trail of all document based activity, including check-in, check-out and version control on changed documents.
- ◆ Keep all departments and project teams in sync by making documents instantly available and easily accessible from within Intacct.

DocuPeak Scan Bench: Scan from any scanner and file documents with database lookups integrated directly with your Intacct database.

Key Features of DocuPeak

The following are a few key points to remember about DocuPeak Solutions:

- **Web-based:** Only a Web browser is required for administration, searching and viewing documents, including mobile devices .
- **Tightly Integrated:** Documents are attached to corresponding Intacct records. Document indexing lookups are fed from Intacct. DocuPeak can even automate the creation of transactions in Intacct.
- **Proven:** DocuPeak is in use today in high volume, mission critical applications such as accounting functions, in both private industry and public entities.

Webiplex Professional Services

The DocuPeak methodology for implementation makes the installation process quick and easy:

- **Entity Analysis:** Review standard document indexing meta data and customize per requirements.
- **Process Analysis:** Customize document flow and indexing based upon existing business process and transaction entry.
- **Capture Analysis:** Review current and future methods for capturing documents.
- **Iteration:** Ongoing consulting to improve business processes across the organization.

“

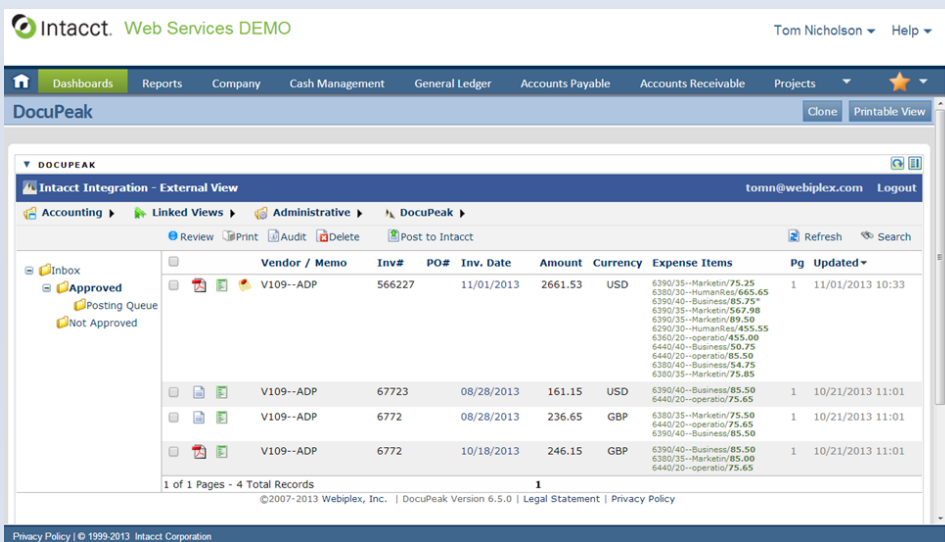

Using DocuPeak to automate and manage our customer purchase request and order fulfillment process saves us time and money.

”

Intacct Integration

DocuPeak can automatically attach records in Intacct that link back to the DocuPeak repository as well as insert transactional data collected in DocuPeak into Intacct.

DocuPeak is designed to integrate into your existing business processes, not force you into adopting new ones. DocuPeak acts as the document and business process layer that integrates the “real-world” of AP, AR and other paper based supplier and customer records with your Intacct Accounting system.

About Webiplex

Webiplex was founded in 2007 to provide the most advanced smart process application platform that is entirely Web based. Our core technology is document management and business process automation. Our platform+ delivers decades of process knowledge to our customers. Through the rapid application development technology of DocuPeak, we aim to serve our customers beyond just a single installed application. We aim to provide a solution whose ROI continues to grow the more it is used.
