

# Why KloudGin

Houston, We have a Scheduling, Time clocking, Customer Experience & Tons of Paper Problem

## What's the result?

- Loss of revenue due to inefficient scheduling & capacity planning
- Customer experience is terrible
- Mobile field users are unproductive in areas with limited cell signal
- Disjointed processes and lots of paper
- Software solutions are hard to use, rigid & costly to deploy

“KloudGin SaaS solutions help us to be at the right place, at the right time with a 360° customer view.”

Christine Petersen, Director, Retail Field Operations  
Sony Computer Entertainment of America

Work Order & Contracts

Scheduling

Asset & Inventory

Field Crew Mobile

GPS

Customer APP

Internet of Things

## The KloudGin Solution

KloudGin is a cloud-based complete Intelligent Field Service & Asset Management software solution helping companies of all sizes manage service contracts, work orders, scheduling, routing, GPS asset tracking, GIS maps, time clocks, purchase orders and inventory, while also providing solutions for customer portal, digital forms, and business analytics — delivered in the cloud, in one-place, in real-time, on-line or offline on any device.

**How?** KloudGin has designed workflows that apply to the unique needs of your industry.

It's built on a configurable cloud platform which leverages modern technologies like Big Data, Mobility, Machine Learning, Cloud, Artificial Intelligence, Internet of Things (response to sensor signals) & Process Automation.

## What's the result?

- Provide customers, employees and contractors easy access to real-time data
- Deliver unfailingly accurate work route schedules with 1 hour arrival windows
- Intelligently predict inventory, maintenance, time to repair based on past history
- Run dispatch on AUTOPILOT mode for emergencies after hours
- Capture photos and e-signatures, track and query assets and work order history
- Eliminate costly software, hardware & upgrade cycles

## About KloudGin

KloudGin is a cloud-based complete Intelligent Field Service & Asset Management Software solution helping companies of all sizes manage contracts, work orders, scheduling, routing, GPS asset tracking, and parts, while eliminating paper forms and providing a complete suite of real-time analytics - delivered in the cloud on any mobile device.

KloudGin provides enterprises a plug-and-play cloud-based native Mobile Application Development Platform (MADP) which is easy to use, easy to configure, leverages data where it lies, and enables transactional & analytical features, all with the ability to deliver on-line/ off-line intelligently.
