Reduce Your Workload With Expensify and Sage Intacct

Expensify's integration with Sage Intacct saves you hours of manual work with a direct connection, bidirectional sync, and configurable settings.

Simplify Your Expenses

Update your manual accounting processes with the Expensify- Sage Intacct integration! Expensify makes it faster than ever to review expenses, reconcile company credit cards, and close your books each month.

Streamline Preaccounting with Expensify

Take the time, paper, and headaches out of your expense reports. Give every employee the Expensify mobile app to upload receipts by simply taking a photo. Expensify automates your preaccounting by SmartScanning the receipts, pulling in expense data, and automatically submitting expenses for users, eliminating expense reports altogether.

Admins can rest easy knowing that reports are automatically checked for policy compliance, leaving less room for human error and oversight when approving reports.

Import Sage Intacct Chart of Accounts

Our direct integration pulls in your company's Sage Intacct expense accounts and dimensions (both standard and user-defined) with one click, allowing users to easily organize expenses using Expensify's mobile or web app.

Seamless Sage Intacct Integration

Keeping your expense data in sync with Sage Intacct has never been easier. Once reports are approved in Expensify, our direct integration automatically exports the expense reports to Sage Intacct — no extra work required for admins.

ExpensifyApproved! Partner Program

Are you an accountant or bookkeeper using Sage Intacct? Become an ExpensifyApproved! partner to receive discounts, dedicated support, specialized training, and more!
