

Sage Intacct Integration: DATABASICS Expense

DATABASICS has partnered with Sage Intacct to provide a pre-built integration in their marketplace, helping you make the most of flexible approval structures, automated policy management, and flexible reporting periods.

Sage Intacct customers can use DATABASICS Expense to automatically export data as well as all relevant code structures and employee information to Sage Intacct. This bi-directional data flow eliminates inconsistencies between the systems and allows customers to fully leverage the combined strengths of Sage Intacct and DATABASICS. The integration is beneficial to a broad range of organizations, but it is of particular value to those with project billing or cost/fund accounting requirements, such as professional services firms, nonprofits, and federal contractors.

Track and manage your expenses, receipts, mileage, and corporate cards with ease and accuracy with DATABASICS Expense. DATABASICS expense software with Sage Intacct integration gives you the best of both worlds – a powerful solution that's easy to use. Streamline your expense management process with flexible, intuitive tools and automated reporting. Gain greater visibility into employee expenses, ensure compliance with corporate policies, and simplify your accounting processes.

Key Benefits of DATABASICS Expense:

- ➔ Quickly submit & approve expenses with configurable multi-level workflows
- ➔ Mobile apps with OCR for seamless receipt capture
- ➔ Receipt management
- ➔ Corporate and P-Card integrations
- ➔ Link travel data from travel management companies and online booking solutions
- ➔ Support for global requirements such as VAT, multi-currency, and multi-language
- ➔ Enforced business policies and approval workflows
- ➔ Audit module for easy reporting and compliance

"DATABASICS is a fantastic addition to the Intacct Marketplace. The integration of DATABASICS employee reporting and management automation technology with Intacct's best-in-class accounting software will be a valuable solution to our customers and their needs." - Former VP of Business Development, Sage Intacct

DATABASICS and Sage Intacct Mapping

| | |
|-----------------------------|---|
| Company | Operating Unit |
| Department | Department |
| Location | Location |
