

Paypool Accounts Payable solution

AP Automation Your Way

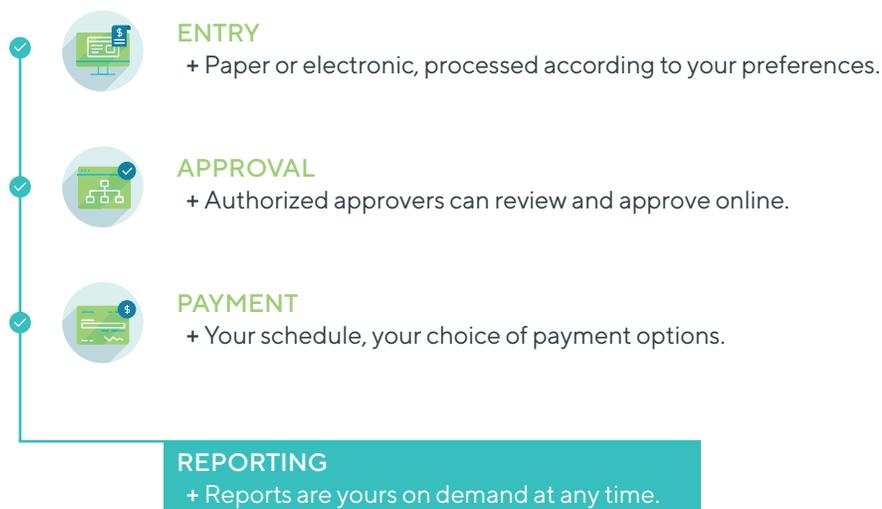

You're using a system that works for your firm. You just want it to work better and faster. That's why Paypool's end-to-end accounts payable automation adapts to your critical AP needs, not the other way around.

Paypool's comprehensive and scalable cloud-based solution integrates with our U.S.-based team to automate your accounts payable in a way that offers you greater convenience and control. The result is lower invoice processing costs, shorter cycle times, increased visibility and access to a greater variety of reports on demand. We can offer all this in part because our sole focus is AP, allowing us to conform to—and in many cases, pioneer—industry best practices.

We Process. You Approve. We Pay. And All the Information is Yours 24/7.

Paypool offers you unsurpassed visibility into, and control of, the process. You have access over the Internet, clear approval authority, improved reporting and seamless integration back into your system. Faster, more reliable and more cost-effective than traditional, paper-based accounts payable departments, Paypool is also more robust than plug-and-play software and far more customizable than outsourcing alternatives.

Our End-to-End AP Automation

Benefits

- + **Secure**
SSAE 18 compliant
- + **Cost Efficient**
Achieve up to a 70% reduction in AP expenses.
- + **Audit Friendly**
Every action is time-dated and user stamped, for simple and accurate audit trails.
- + **Strategic**
Frees you and your staff from mundane tasks, giving you more time to focus on business strategies.
- + **Conforms to Your Organization**
Approval processes and authority are clear and well defined.
- + **Economical**
Transaction-based fee model ensures reasonable costs for the small to medium sized enterprise while minimizing excess capacity costs associated with user-based licensing fee structures.
